

CARMIGNAC
INVESTING IN YOUR INTEREST

SUSTAINABILITY-RELATED DISCLOSURES **CARMIGNAC PORTFOLIO GRANDE EUROPE**

IN ACCORDANCE WITH ARTICLE 10 (EU SFDR 2019/2088 – LEVEL II)

This Sub-Fund invests in sustainable investments in accordance with Article 9 of the Sustainable Finance Disclosure Regulation ("SFDR").

The Sub-Fund's sustainable objective is to invest at least 80% of the Sub-Fund's net assets in shares of companies that are considered aligned with relevant United Nations Sustainable Development Goals ("the SDGs"). The minimum levels of sustainable investments with environmental and social objectives are respectively 10% and 30% of the Sub-Fund's net assets

The Sub-fund also aims to achieve carbon emissions 50% lower than its reference indicator (STOXX 600 Europe), measured monthly by carbon intensity (tCO₂/ mUSD revenue converted to Euros; aggregated at portfolio level (Scope 1 and 2 of GHG Protocol).

The investment universe is assessed for ESG risks and opportunities recorded in Carmignac proprietary ESG platform "START" (System for Tracking and Analysis of a Responsible Trajectory). The extra-financial analysis is implemented in the investment strategy by undertaking activities described below whereby the Sub-Fund's investment universe is actively reduced by at least 20%.

ii) Firm-wide: Negative screening and exclusions of unsustainable activities and practices are identified using an international norms and rules-based approach on the following: (a) controversies against the OECD business guidelines, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work and UN Global compact principles, (b) controversial weapons, (c) thermal coal mining, (d) power generation companies, € tobacco, (f) adult entertainment.

ii) Fund-specific: Extended activity or stricter exclusion criteria cover oil and gas, weapons, gambling, alcohol, power generation and thermal coal mining. In addition, the companies with a MSCI ESG rating of CCC are excluded. Companies with a Co₂ intensity greater than 500 tCO₂/mEUR revenue are excluded. The universe is further reduced by the number of companies deemed not aligned according to our SDG alignment assessment, as described above.

From an active stewardship perspective, environmental and social related company engagements are performed with an objective leading to improvement in companies' sustainability policies (active engagement and voting policies – number of engagements – level of attainment versus the 100% objective of participation at shareholder and bondholder meetings).

All the investments of the Sub-Fund are examined for adherence to global norms on environmental protection, human rights, labor standards and anti-corruption, through controversy screening. Furthermore, this Sub-Fund is committed to considering Principal Adverse Impacts whereby 14 mandatory and 2 optional environmental and social indicators and if relevant 2 Sovereign-related PAIs, are as indicated in the Annex 1 of the SFDR Level II 2019/2088.

This Sub-Fund uses the following sustainability indicators to measure the attainment of the sustainable objective:

- Alignment with Sustainable Development Goals
- The coverage rate of ESG analysis
- The amount the equity universe is reduced by (minimum 20%):
- Low carbon intensity target
- Principal Adverse Impacts indicators
- Active stewardship voting participation rate

Further information regarding the methodology of monitoring the aforementioned indicators can be found in the document below.

The investment team are ultimately responsible for the proprietary ESG assessment. The auto populated START score is determined by a proprietary formula comparing companies within 90 peer groups aggregated by capitalization, sector and region. An upgrade or downgrade of this score can be made during the proprietary

analysis and commentary by the financial or ESG analyst. The START score statistics are monitored for bias, frequency, and coherence by the Sustainable Investment team.

All sectorial and controversy exclusions are hard exclusions. The Sustainable investment team have a separate reporting line to the Managing Director of Carmignac UK.

The Sub-Fund uses several data sources that are aggregated into the Carmignac proprietary ESG System START. The sources are FactSet for revenue data, corporate filings for CAPEX data, S&P Trucost for carbon emissions data, TR Refinitiv for raw company ESG data, MSCI and ISS ESG for controversial behaviours, UNGC and OECD Business and Human Rights Norms screening and MSCI ESG for operational alignment.

The Sub-Fund's sustainability risk may differ from the sustainability risk of the Reference indicator. In terms of methodology, our SDG Framework is just one framework that can be used to illustrate positive outcomes; there are others that may yield different results

The attainment of the sustainable objective is ensured on a continuous basis through monitoring and controls and will be published monthly on the Sub-Fund's webpage

The Sub-Fund has not designated a reference benchmark for the purposes of showing the attainment of the sustainable investment objective.

No significant harm to the sustainable investment objective

All the investments of the Sub-Fund are examined for adherence to global norms on environmental protection, human rights, labor standards and anti-corruption, through controversy screening. More precisely, the investments are subject to a screening of minimum safeguards to ensure that their business activities are aligned with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights. Additionally, the Sub-Fund ensures that such activities do not significantly harm the environmental objectives.

Controversial behaviours engagement is aimed at eliminating a company's breach of the UNGC and/ or OECD Guidelines for Multinational Enterprises and installing proper management systems to prevent such a breach from recurring. If engagement is unsuccessful, the company is considered for exclusion. Enhanced engagement cases are selected quarterly depending on the need for a follow-up. Engagement focus can differ between various investment exposures.

Furthermore, this Sub-Fund is committed to applying the SFDR level II 2019/2088 Regulatory Technical Standards (RTS) annex 1 related to Principal Adverse Impacts whereby 14 mandatory and 2 optional environmental and social indicators and if relevant 2 Sovereign-related PAIs, are as indicated in the Annex 1 of the SFDR Level II 2019/2088. will be monitored to show the impact of such sustainable investments against these indicators: Greenhouse gas emissions, Carbon footprint, GHG intensity (investee companies), Exposure to companies in fossil fuel sector, Non-renewable energy consumption and production, Energy consumption intensity per high-impact climate sector, Activities negatively affecting biodiversity-sensitive areas, Emissions to water, Hazardous waste ratio, Water usage and recycling (optional choice), Violations of UN Global Compact principles or OECD Guidelines for Multinational Enterprises, Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact and OECD Guidelines for Multinational Enterprises, Unadjusted gender pay gap, Board gender diversity, Exposure to controversial weapons, Excessive CEO pay ratio (optional choice).

Adverse impacts are identified for degree of severity. After discussion with the investment team concerned an action plan is established including a timeline for execution. Company dialogue is usually the preferred course of action to influence the company's mitigation of adverse impacts, in which case the company engagement is included in the quarterly Carmignac Engagement plan according to the Carmignac Shareholder Engagement policy. Disinvestment may be considered with a predetermined exit strategy within the confines of this aforementioned policy

Sustainable investment objective of the financial product

This Sub-Fund invests in sustainable investments in accordance with Article 9 of the Sustainable Finance Disclosure Regulation (“SFDR”).

The Sub-Fund’s sustainable objective is to invest at least 80% of the Sub-Fund’s net assets in shares of companies that are considered aligned with relevant United Nations Sustainable Development Goals (“the SDGs”). The minimum levels of sustainable investments with environmental and social objectives are respectively 10% and 30% of the Sub-Fund’s net assets.

Alignment is defined for each investment / investee company by meeting at least one of the following three thresholds:

- a) Products and services:** the company derives at least 50% of its revenue from goods and services that are related to one of the following nine SDGs: (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or
- b) Capital expenditure:** the company invests at least 30% of its capital expenditure in business activities that are related to one of the following nine SDGs (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or
- c) Operations:**
 - i. the company achieves an “aligned” status for operational alignment for at least three (3) out of all seventeen (17) of the SDGs, based on the evidence provided by the investee company of available policies, practices and targets addressing such SDGs. An “aligned” status represents an operational alignment score of ≥ 2 (on a scale of -10 to +10) as determined by the external scoring provider; and
 - ii. the company does not achieve a “misaligned” status for operational alignment for any SDG. A company is considered “misaligned” when its score is ≤ -2 (on a scale of -10 to +10), as determined by the external scoring provider.

The Sub-Fund also contributes through its investments to the following environmental objectives: climate change mitigation and climate change adaptation. The Sub-fund aims to achieve carbon emissions 50% lower than its reference indicator (STOXX 600 Europe), measured monthly by carbon intensity (tCO₂/ mUSD revenue converted to Euros; aggregated at portfolio level (Scope 1 and 2 of GHG Protocol).

The Sub-Fund has not designated a reference benchmark for the purposes of showing the attainment of the sustainable investment objective. The objective is an absolute target to invest a minimum of 80% of net assets into companies on a continuous basis that are aligned to one of the SDGs according to the predefined revenue, CAPEX or operations thresholds .

Investment Strategy

In order to achieve its investment objective, the Sub-Fund seeks to invest in companies that exhibit strong reinvestment rates and recurrent profitability. In addition, the Sub-Fund adopts a socially responsible approach using best in universe and best efforts selection process and both positive and negative screening to identify companies with long term sustainable growth criteria.

In addition to the aforementioned sustainable investment objectives, ESG integration is performed through the following procedures:

The investment universe is assessed for ESG risks and opportunities recorded in Carmignac proprietary ESG platform "START" (System for Tracking and Analysis of a Responsible Trajectory). The extra-financial analysis is implemented in the investment strategy by undertaking activities described below whereby the Sub-Fund's investment universe is actively reduced by at least 20%. The full process of the reduction of the investment universe is found in the corresponding Transparency Code on the Carmignac website. The initial universe for universe reduction purposes is composed of 1200 listed European stocks with over 1 billion Eur market capitalization.

- i) **Firm-wide:** Negative screening and exclusions of unsustainable activities and practices are identified using an international norms and rules-based approach on the following: (a) controversies against the OECD business guidelines, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work and UN Global compact principles, (b) controversial weapons, (c) thermal coal mining, (d) power generation companies, (e) tobacco, (f) adult entertainment.
- ii) **Fund-specific:** Extended activity or stricter exclusion criteria cover oil and gas, weapons, gambling, alcohol, power generation and thermal coal mining. In addition, the companies with a MSCI ESG rating of CCC are excluded. Companies with a Co2 intensity greater than 500 tCO2/mEUR revenue are excluded. The universe is further reduced by the number of companies deemed not aligned according to our SDG alignment assessment, as described above.

From an active stewardship perspective, environmental and social related company engagements are performed with an objective leading to improvement in companies sustainability policies (active engagement and voting policies - number of engagements - level of attainment versus the 100% objective of participation at shareholder and bondholder meetings).

In order to assess good governance practices, the Sub-Fund applies Carmignac proprietary ESG research system START, which gathers key governance indicators automated for over 7000 companies, including 1) the percentage of Audit Committee Independence, Average Board Tenure, Board Gender Diversity, Board Size, Compensation Committee Independence as it relates to sound management structures, 2) Executive Compensation, Executive Sustainability Incentive, Highest Remuneration Package as it relates to remuneration of staff. Employee relations are covered within Carmignac Social indicators (namely through employee satisfaction, gender pay gap, turnover of employees) within START.

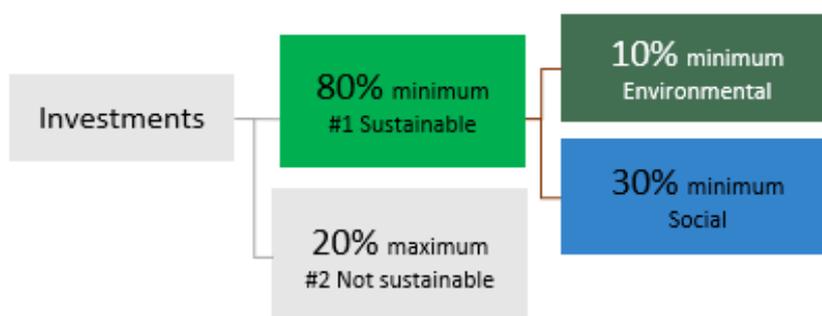

As for taxation, the Sub-Fund recognize companies in it investment universe which adhere to the OECD Guidelines for multinational enterprises on taxation and push for disclosure where necessary.

In addition, as signatory of the PRI, we Carmignac would expect from the companies it invests in to:

- o Publish a global tax policy that outlines the company's approach to responsible tax,
- o Report on tax governance and risk management processes; and
- o Report on a country-by-country basis (CBCR)

This is a consideration Carmignac increasingly integrates into its engagements with corporates and votes in support for more transparency via for example support for shareholder resolutions.

Proportion of Investments

A proportion of 80% of this Sub-Fund's net assets is used to meet the sustainable objective.

The minimum levels of sustainable investments with environmental and social objectives are respectively 10% and 30% of the Sub-Fund's net assets.

The "#2 Not sustainable investments" include cash and derivative instruments, which may be used for efficient portfolio management and/or hedging purposes.

Monitoring of Environmental or Social Characteristics

This Sub-Fund uses the following sustainability indicators to measure the attainment of the sustainable objective :

Alignment with Sustainable Development Goals:

The Sub-Fund's sustainable objective is to invest at least 80% of the Sub-Fund's net assets in shares of companies that are considered aligned with relevant United Nations Sustainable Development Goals ("the SDGs"). The minimum levels of sustainable investments with environmental and social objectives are respectively 10% and 30% of the Sub-Fund's net assets.

Alignment is defined for each investment / investee company by meeting at least one of the following three thresholds:

- a) **Products and services:** the company derives at least 50% of its revenue from goods and services that are related to one of the following nine SDGs: (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or
- b) **Capital expenditure:** the company invests at least 30% of its capital expenditure in business activities that are related to one of the following nine SDGs (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or
- c) **Operations:**
 - i. the company achieves an "aligned" status for operational alignment for at least three (3) out of all seventeen (17) of the SDGs, based on the evidence provided by the investee company of available policies, practices and targets addressing such SDGs. An "aligned" status represents an operational alignment score of ≥ 2 (on a scale of -10 to +10) as determined by the external scoring provider; and
 - ii. the company does not achieve a "misaligned" status for operational alignment for any SDG. A company is considered "misaligned" when its score is ≤ -2 (on a scale of -10 to +10), as determined by the external scoring provider.

The coverage rate of ESG analysis: ESG integration through ESG scoring using Carmignac's proprietary ESG platform "START" (System for Tracking and Analysis of a Responsible Trajectory) is applied to at least 90% of issuers.

The amount the equity universe is reduced by (minimum 20%):

i) Firm-wide: Negative screening and exclusions of unsustainable activities and practices are identified using an international norms and rules-based approach on the following: (a) controversies against the OECD business guidelines, the International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work and UN Global compact principles, (b) controversial weapons, (c) thermal coal mining, (d) power generation companies, (e) tobacco, (f) adult entertainment.

ii) Fund-specific: Extended activity or stricter exclusion criteria cover oil and gas, weapons, gambling, alcohol, power generation and thermal coal mining. In addition, the companies with a MSCI ESG rating of CCC are excluded. Companies with a Co2 intensity greater than 500 tCO2/mEUR revenue are excluded. The universe is further reduced by the number of companies deemed not aligned according to our SDG alignment assessment, as described above.

Low carbon intensity target: the Sub-fund aims to achieve carbon emissions 50% lower than its reference indicator (STOXX 600 Europe), as mentioned above.

Principal Adverse Impacts indicator monitoring whereby 14 mandatory and 2 optional environmental and social indicators (selected by the Responsible Investment team for pertinence and coverage) will be monitored to show the impact of such sustainable investments against these indicators as mentioned above.

Active stewardship: Environmental and social related company engagements leading to improvement in companies sustainability policies are measured by following indicators: (a) level of active engagement and voting policies, (b) number of engagements, (c) rate of voting and (d) participation at shareholder and bondholder meetings.

Methodologies

SDG alignment methodology.

Alignment is defined for each investment / investee company by meeting at least one of the following three thresholds:

- a) Products and services:** the company derives at least 50% of its revenue from goods and services that are related to one of the following nine SDGs: (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or
- b) Capital expenditure:** the company invests at least 30% of its capital expenditure in business activities that are related to one of the following nine SDGs (1) No Poverty, (2) No Hunger, (3) Good Health and Well Being, (4) Quality Education, (6) Clean Water, (7) Affordable and Clean Energy, (9) Industry, Innovation and Infrastructure, (11) Sustainable Cities and Communities, (12) Responsible Consumption and Production; or
- c) Operations:**
 - i. the company achieves an "aligned" status for operational alignment for at least three (3) out of all seventeen (17) of the SDGs, based on the evidence provided by the investee company of available policies, practices and targets addressing such SDGs. An "aligned" status represents an

operational alignment score of ≥ 2 (on a scale of -10 to +10) as determined by the external scoring provider; and

- ii. the company does not achieve a “misaligned” status for operational alignment for any SDG. A company is considered “misaligned” when its score is ≤ -2 (on a scale of -10 to +10), as determined by the external scoring provider.

Secondly, in order to determine which companies are aligned for Operations, we use an external scoring methodology to create an indicative operational alignment screen. Each investee company is assessed on each of the 17 SDGs and their performance is rated from -10 to +10 for each SDG. To calculate this score, for each SDG, there are (1) Positive indicators linked to evidence of policies, initiatives and targets with specific KPIs which result in positive additions to the scores, (2) Negative indicators, linked to controversies or adverse impacts which results in negative subtractions to the score and (3) Performance indicators which assess trajectory of performance which can be additive or negative for the score. The above three assessments are aggregated into a final score for each SDG between the aforementioned -10 to + 10 range. This means that each company has 17 scores, one for each SDG, between -10 and +10.

The entire range scale is divided into five result categories as follows:

- >5.0 : Strongly Aligned
- Score between 2.0 and 5.0, inclusive: Aligned
- Score less than 2.0 but higher than (-2.0): Neutral
- Score equal to or less than (-2.0) but higher than (-10): Misaligned
- Score equal to (-10): Strongly Misaligned

Once the threshold for alignment for the Products and Services, Capital expenditure or Operational is met, the full weight of the holding is considered aligned.

ESG analysis methodology. The Carmignac’s proprietary ESG platform “START” (System for Tracking and Analysis of a Responsible Trajectory) provides a platform that aggregates raw company ESG data of 31 ESG indicators, if available, across Environmental, Social and Governance pillars. Overall ESG scores for companies grouped by sector, capitalisation and region are computed. The investment team members are responsible for company proprietary ESG analysis and confirms the START score and analysis by a commentary of ESG risks and integrates these analyses into the investment decisions. The START platform is available on the Verity RMS internal database for investment research accessible to all investment staff.

Negative screening and exclusions methodology. Carmignac employs ESG related exclusions and specific extended Sub-Fund exclusions, as mentioned above, which are hard exclusions implemented into the compliance tool CMGR linked to the BBG Aim Portfolio Management Order system. Every quarter the Exclusion lists are reviewed by the Sustainable Investment team including the following updates: index reweighting, revised revenue data and revenue thresholds and new investments. The updated list is uploaded and monitored by the Risk Management team. For further information please refer to the Exclusion policy on the Carmignac Sustainable Policy and Reports web page

Carbon emission target methodology. Carbon emissions targets are monitored real time through the portfolio dashboard Global Portfolio Monitoring system. S&P Trucost is used for carbon data measuring carbon intensity (tCO₂/ mUSD revenue converted to Euros; aggregated at portfolio level (Scope 1 and 2 of GHG Protocol. For further information please refer to the Sub-Funds monthly factsheet.

Principal Adverse Indicator (PAI) Impact methodology. Carmignac sources the Principle Adverse Impact indicators for all funds classified as Article 8 or 9 under the EU SFDR from the data provider MSCI ESG. Each indicator data point is sourced and averaged over 4 quarters before a yearly publication is made. The definitions for each of the 14 mandatory equity-related PAIs plus two optional, and if relevant 2 Sovereign-related PAIs, are as indicated in the Annex 1 of the SFDR Level II 2019/2088. Publication and full methodology will be published on the Carmignac Sustainable Investment website in 2023 in line with the aforementioned Disclosure requirements .

Stewardship and engagement methodology. The Sub-Fund exercises its votes to seek a 100% voting participation target through the proxy voting provider ISS. The Portfolio Manager has control of the voting choice and exercises

that right with the recommendation of the Sustainable Investment team. ESG and controversy related Engagements led by the Sustainable investment team are programmed each quarter, the outcomes of which, are documented in the Engagement tool within the Investment team Verity RMS database. For further information please refer to the Stewardship Report on the Carmignac Sustainable Policy and Reports web page.

Data Sources and Processing

(a) **The data sources used to attain the sustainable investment objective of the financial product:** The Sub-Fund uses several data sources that are aggregated into the Carmignac proprietary ESG System START. The sources are FactSet for revenue data, corporate filings for CAPEX data, S&P Trucost for carbon emissions data, TR Refinitiv for raw company ESG data, MSCI and ISS ESG for controversial behaviors, UNGC and OECD Business and Human Rights Norms screening and MSCI ESG for operational alignment.

(b) **The measures taken to ensure data quality:** The Sustainable investment team includes ESG data experts who are in charge of automated checks such as identifying outliers in a data set, as well as verifying alternative data sources.

(c) **How data are processed:** as explained in the Methodologies section, the revenue data (main criteria to monitor the sustainable objective) is monitored through FactSet and mapped through investable themes that are aligned with the aforementioned UN Sustainable Development Goals.

(d) **The proportion of data that are estimated:** ESG START scoring and company revenue data is not estimated. PAIs data, contain an average of 36% estimations whereby all reported PAIs are aggregated for all Carmignac eligible funds as of June 2023. Carbon emissions data (Scope 1 and 2) are mainly based on fully disclosed company emissions declarations with few estimations.

Limitations to Methodologies and Data

The Sub-Fund's sustainability risk may differ from the sustainability risk of the Reference indicator. In terms of methodology, our SDG Framework is just one framework that can be used to illustrate positive outcomes; there are others that may yield different results. The approach uses public revenue data and is based upon the UN SDGs' targets and literature. However, as the mapping of the specific business activities that are to be considered 'aligned' is proprietary, there may be variations between our approach and others.

Due Diligence

Over 90% of the Sub-Funds' assets (listed equities, corporate and sovereign bonds where applicable) are assessed for ESG score and risks. Proprietary analysis is combined with the ESG scoring process of Carmignac's proprietary system START and the sovereign bond proprietary models (Global and Impact models) where applicable.

The investment team are ultimately responsible for the proprietary ESG assessment. The auto populated START score is determined by a proprietary formula comparing companies within 90 peer groups aggregated by capitalization, sector and region. An upgrade or downgrade of this score can be made during the proprietary analysis and commentary by the financial or ESG analyst. The START score statistics are monitored for bias, frequency, and coherence by the Sustainable Investment team. Periodically, both the sovereign and corporate START ESG proprietary scoring systems are back tested for potential improvement.

Regarding exclusions, on a quarterly basis the Carmignac company exclusion list and the fund specific exclusion lists if relevant are reviewed including the following updates: index reweighting, revised revenue data and impact on revenue thresholds, fund new holdings. These exclusions are entered via the compliance tool. All sectorial and controversy exclusions are hard exclusions. The Sustainable investment team have a separate reporting line to the Managing director of Carmignac UK.

Engagement of Policies

Carmignac operates active voting and engagement policies that reflect their environmental, social and governance themes. The voting participation target is 100% of all possible votes. An Engagement plan is established to identify engagements with companies in which we are invested that show poor management of ESG related risks, where Carmignac has identified a specific theme, or where a specific impact or investigation of a controversy is required.

Please refer to the engagement policy : [Policies and Reports](#)

Designated Benchmark

The attainment of the sustainable objective is ensured on a continuous basis through monitoring and controls and will be published monthly on the Sub-Fund's webpage. The Sub-Fund has not designated a reference benchmark for the purposes of showing the attainment of the sustainable investment objective. The objective is an absolute target to invest a minimum of 80% of net assets into companies on a continuous basis that are aligned to one of the SDGs according to the predefined revenue, CAPEX or operations thresholds.

In addition, the Sub-Fund's Carbon emissions target is to achieve carbon intensity 50% lower than its reference indicator is monitored in real time basis through the global portfolio management system

The coverage rate of ESG analysis: ESG integration through ESG scoring using Carmignac's proprietary ESG platform "START" is applied to at least 90% of issuers and is monitored and reported on a monthly basis.

Minimum universe reduction of 20%: Negative screening and exclusions of unsustainable activities and practices reflected in low ESG scores from, MSCI and or Controversy scores as well as Carbon emissions. The universe is further reduced by the number of companies deemed not aligned according to our SDG alignment assessment. This is monitored on a quarterly basis.

Active stewardship: Environmental and social related company engagements leading to improvement in companies' sustainability policies are measured by following indicators: (a) level of active engagement and voting policies, (b) number of engagements, (c) rate of voting and (d) participation at shareholder and bondholder meetings).

- **Fund:** Carmignac Portfolio Grande Europe
- **Management:** Equity strategies
- **Legal form:** Luxembourg SICAV sub-fund eligible for the PEA
- **ISIN code (A EUR acc share class):** LU0099161993
- **Recommended minimum investment horizon:** 5 years
- **Risk scale:** 6
- **Fund inception date:** 01/07/1999
- **Reference indicator:** Stoxx 600 (Reinvested net dividends)
